BASED IN
Jujuy, Argentina · remote

Full stack developer and product founder. Since 2022 I take ideas to production in weeks: mobile apps, business systems, SaaS, e-commerce and AI automation. I founded KILO (a business management system with an app on Google Play) and the agency ZonaJujuy. I work with Claude and Codex to ship faster, with senior quality and fixed prices.

WHAT I CAN BUILD FOR YOU

Mobile apps

Android and iOS, published on the stores.

Custom systems

ERP, point of sale, booking, inventory, CRM.

SaaS & MVPs

Your startup in production in weeks.

Websites & WordPress

Landing pages, company sites and e-commerce.

AI & automation

WhatsApp bots, assistants and RAG.

Fixes & support

I improve, migrate and maintain what you have.

PROJECTS IN PRODUCTION

KILO

somoskilo.com

Multi-tenant ERP + point of sale with an Android app on Google Play. Idea to production in 4 months.

Chefi

chefi.zonajujuy.com

Restaurant SaaS: QR ordering, WhatsApp login. 40% fewer order errors.

SLOT · ZonaSalud

slot.zonajujuy.com

Booking, QR queues and AI-summarized medical records.

Aevum

aevum.zonajujuy.com

AI (RAG) that answers questions about a company's documents.

Client websites

zonajujuy.com

E-commerce, landing pages and local-SEO sites: Inti Mates, Petit, La Burguesita and more.

HOW I WORK

01
15-min call

02
Proposal & fixed price in 48 h

03
Weekly demos

04
